

Two-model combine pipeline — Mac ↔ Midway

SET UP

new_combine.py
→ config + RUNBOOK.txt

1 COMBINE

build inputs
(query, models.json)

push

potts_align cache
run_...align + finalize

pull

score + E_tot weights
+ figures

2 DESIGN

design spec
(from `all`)

push

joint anneal
run_design + finalize

pull

design figures

3 CHARACTERIZE

ESMFold + TM-align
+ BLAST · run_characterize

pull

characterization
figures

push / pull = scripts/sync_models.sh

Mac (figures, scoring)

Midway (heavy compute)
